About Us

DISMAR GROUP is a leading manufacturer and installer of aluminum façade systems, serving the construction, commercial, medical and industrial sectors since 2007.

Engineered façades
for modern buildings

Mission

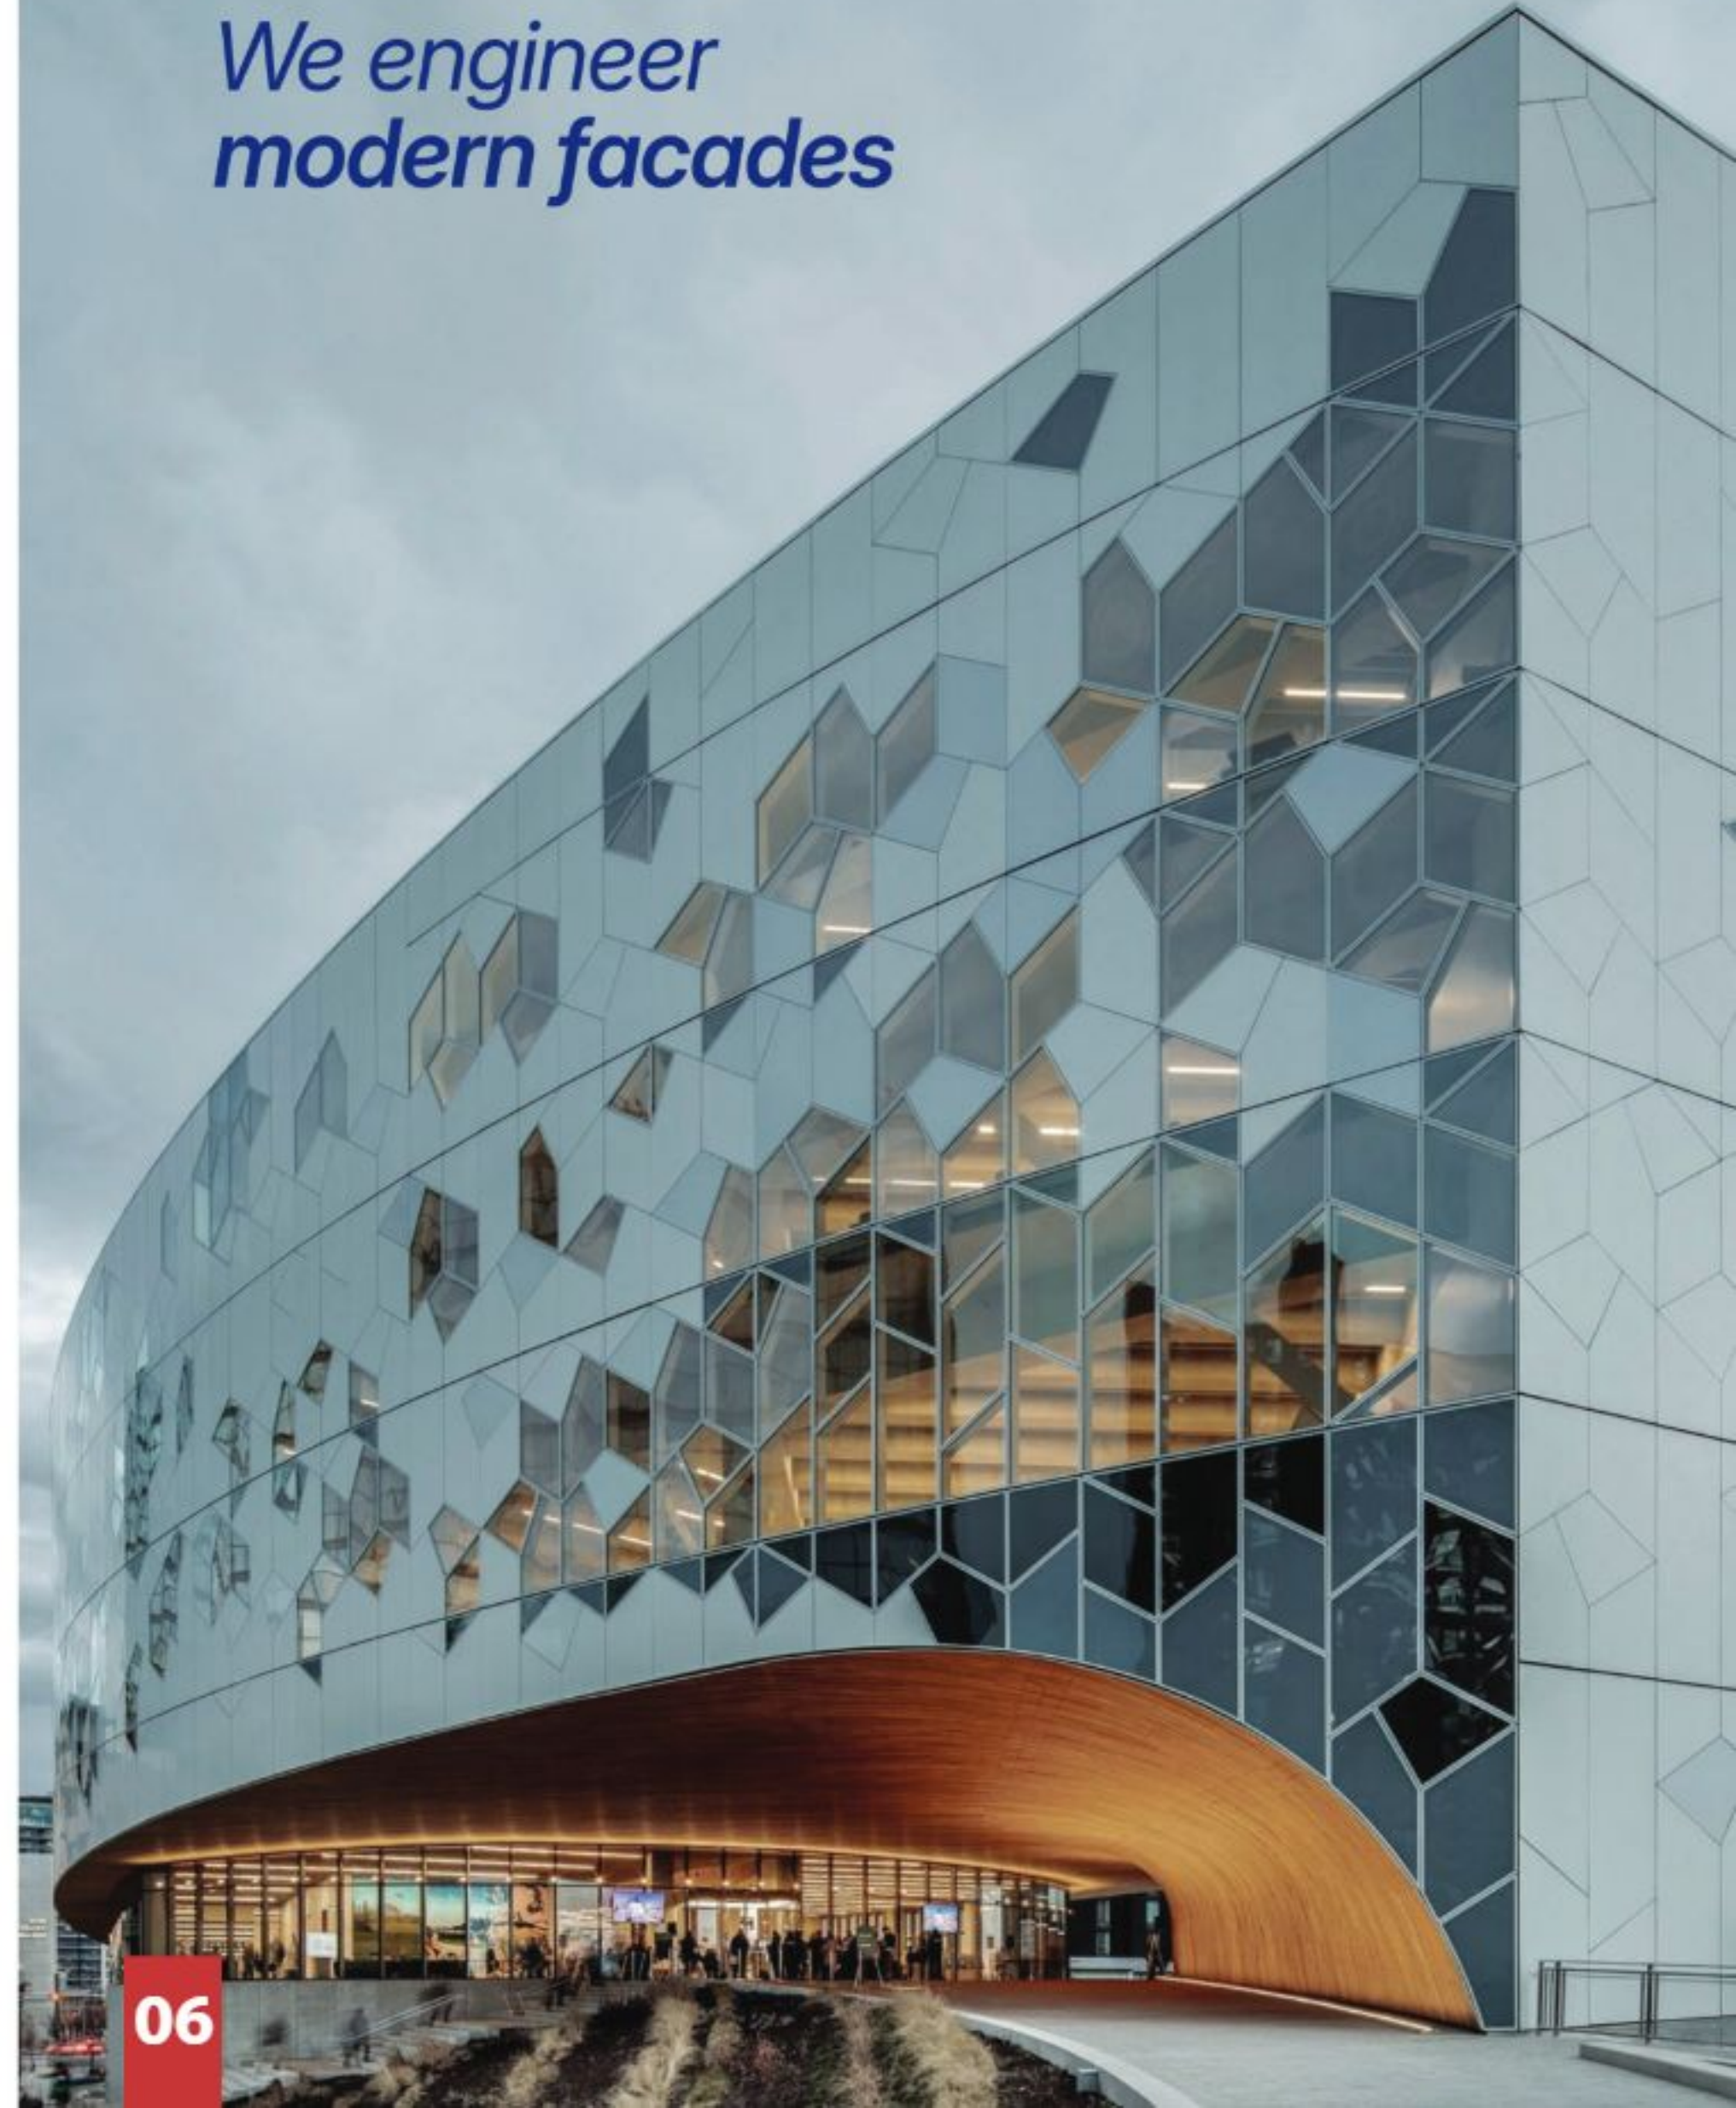

To deliver world-class facade and aluminum systems tailored to the architectural, industrial, and commercial needs of Iraq and the region—through innovation, engineered precision, and uncompromising quality.

Vision

To become the most trusted façade and architectural aluminum solutions provider in the Middle East—recognized for excellence international standards, and innovative building technologies.

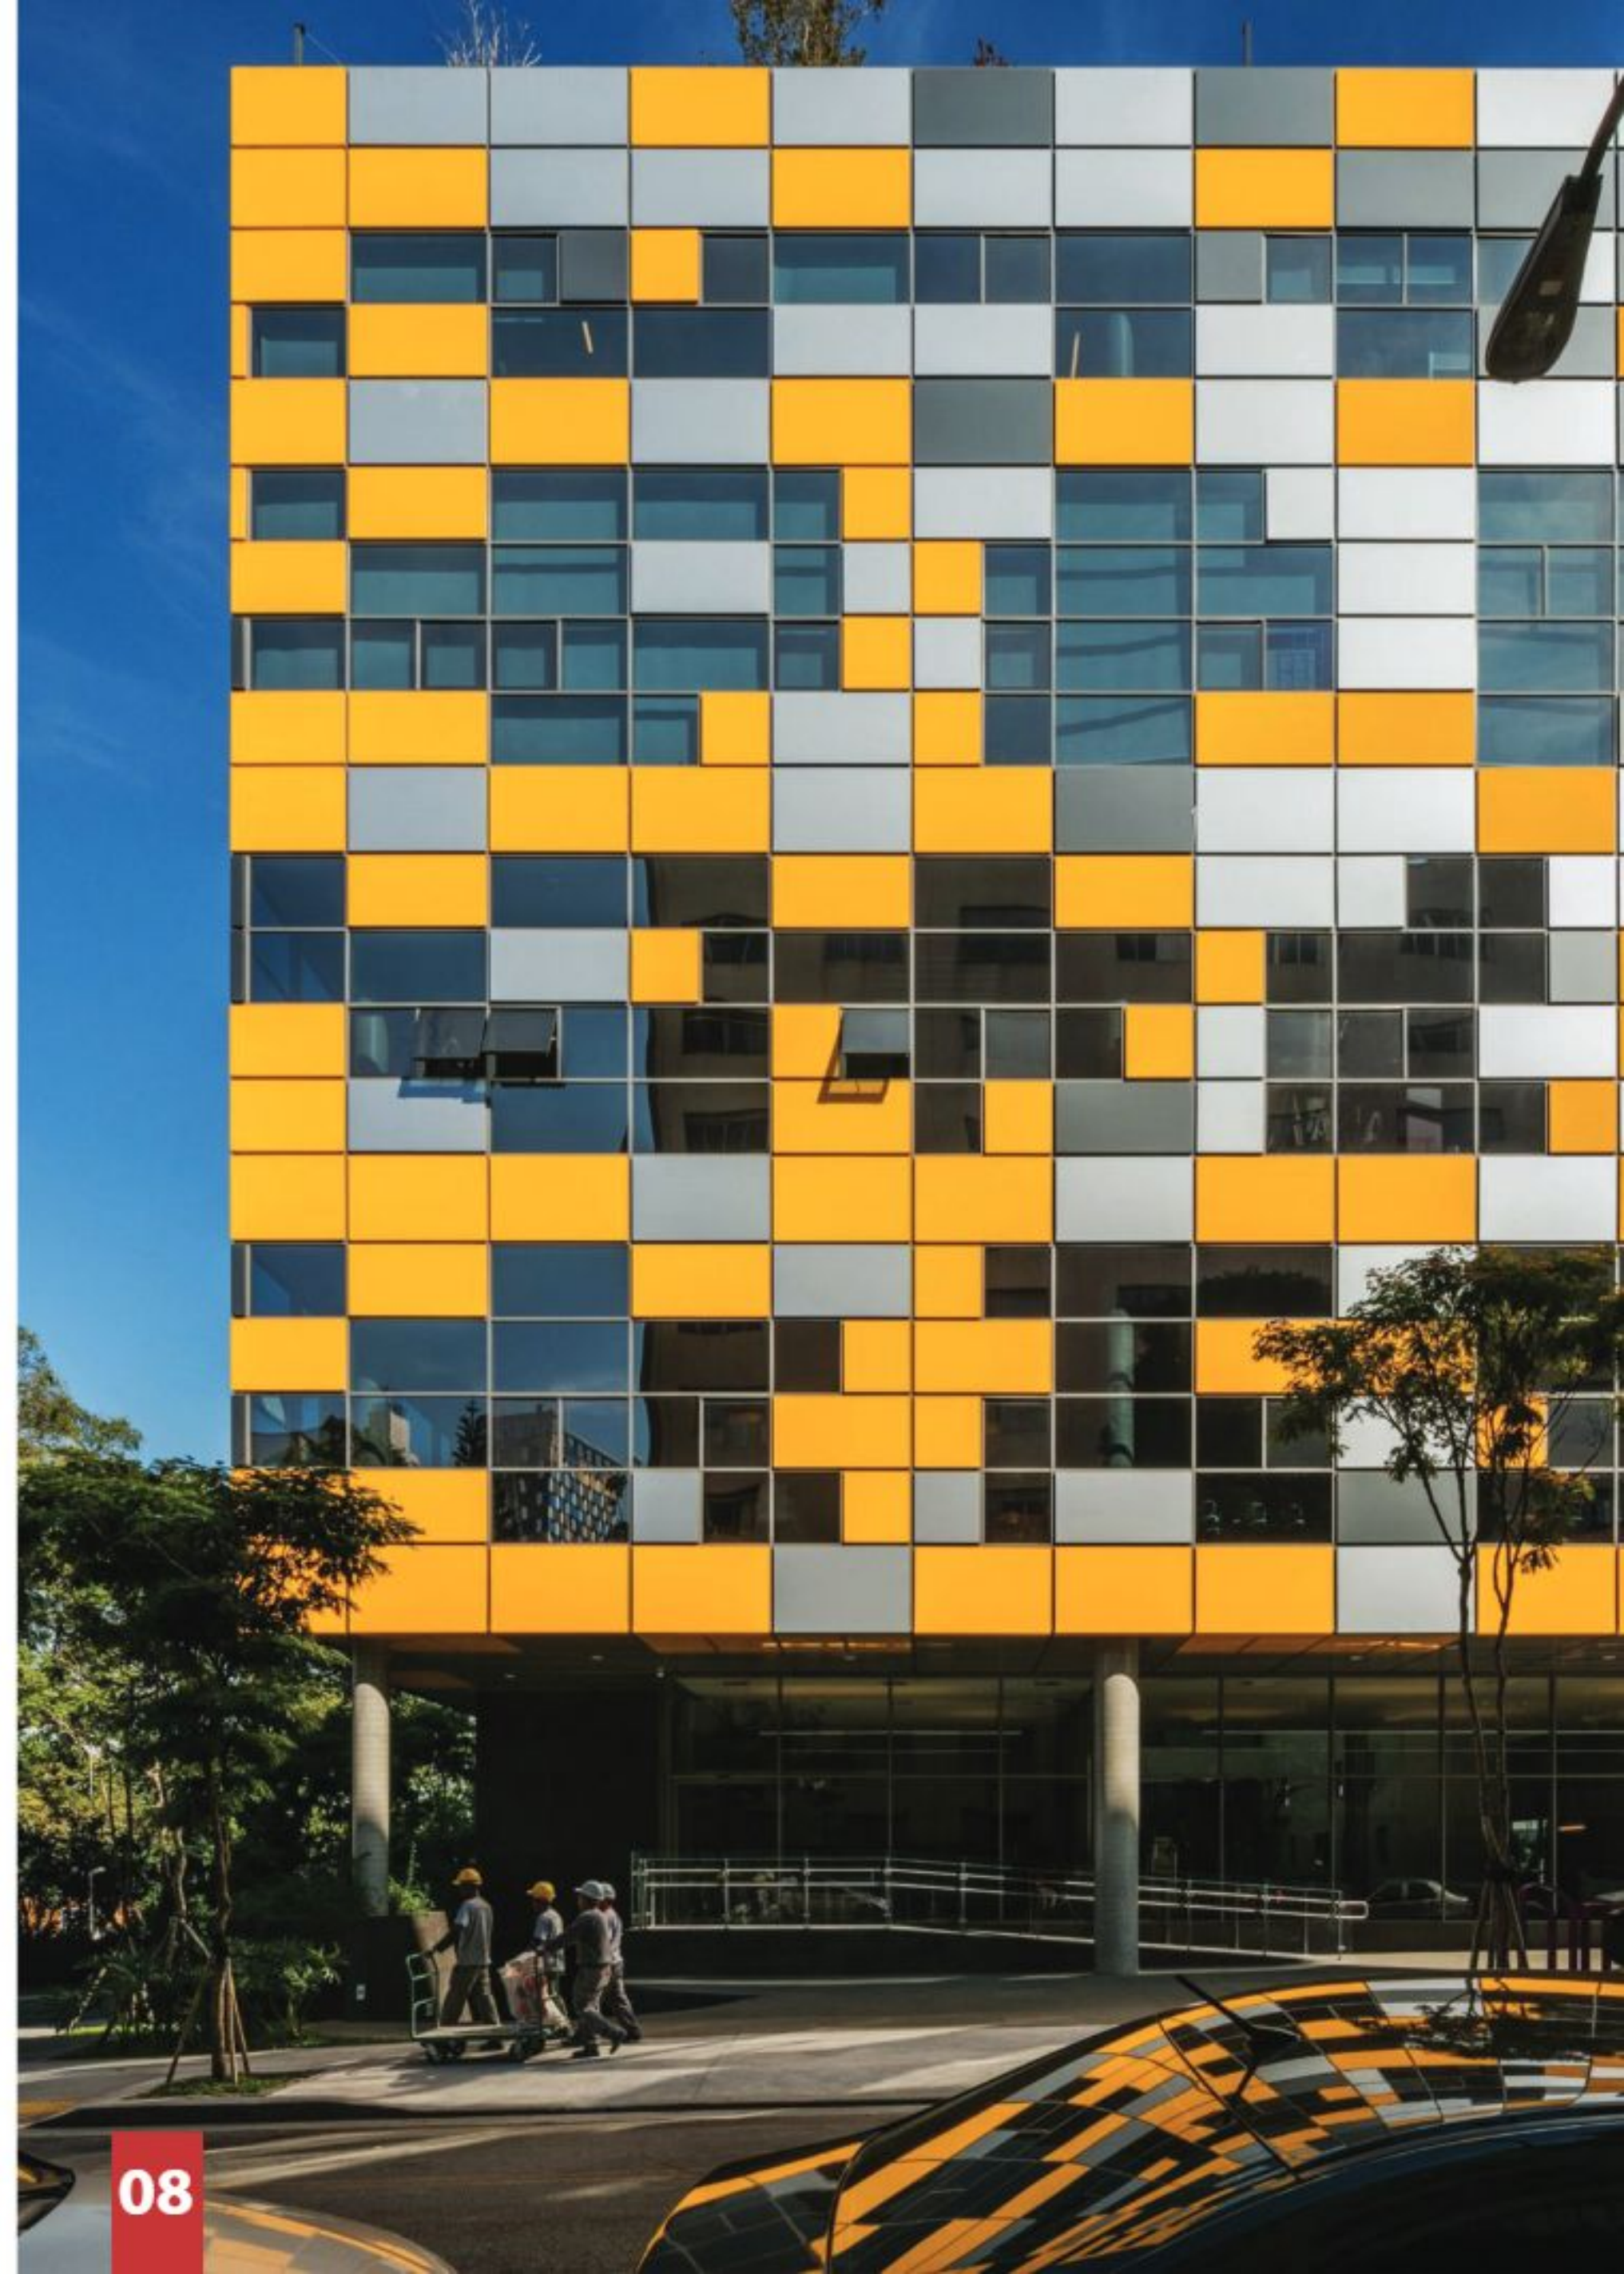

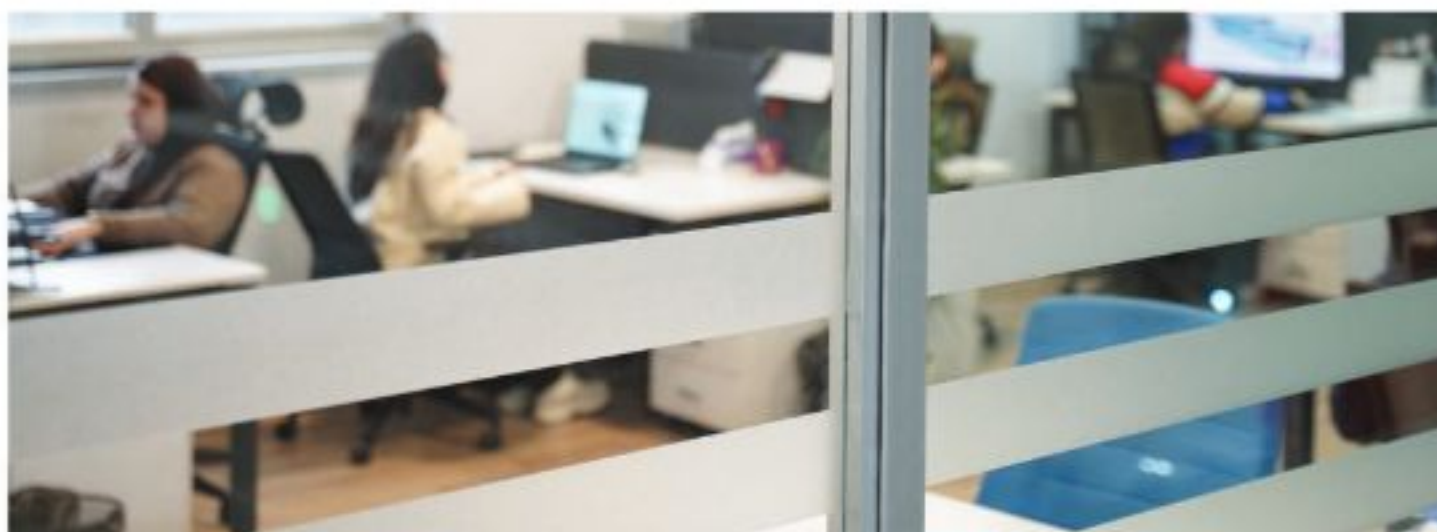

*We engineer
modern facades*

Our Values

At Dismar Group, our values guide every step of our work from material selection to final installation. We are committed to excellence, innovation, and reliability in all our facade solutions. We believe in delivering long-lasting quality through precise engineering, transparent partnerships, and a dedication to craftsmanship. By combining modern technology with skilled expertise we ensure that every project reflects our integrity and our passion for shaping enduring, high-performance architectural surfaces.

Why Dismar Group?

Over 18 years of proven industry experience since 2007

Advanced manufacturing facilities in Erbil and Duhok, totaling more than 7,000 m²

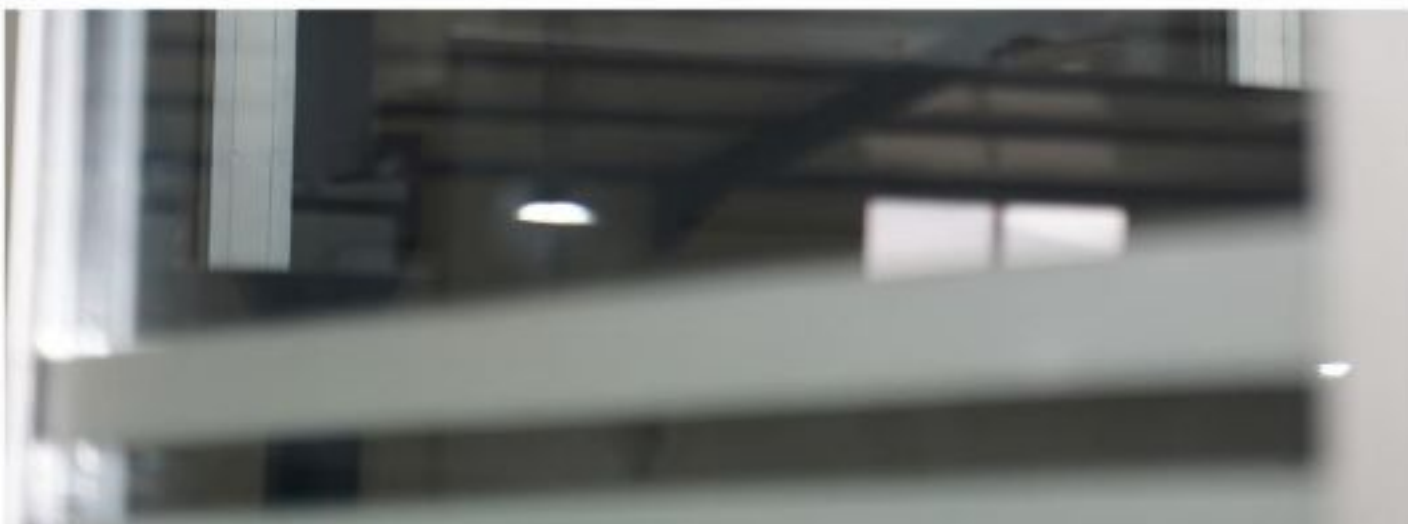

Complete project delivery from design and engineering to installation

Hundreds of successfully completed projects across Iraq, Turkey, and Europe

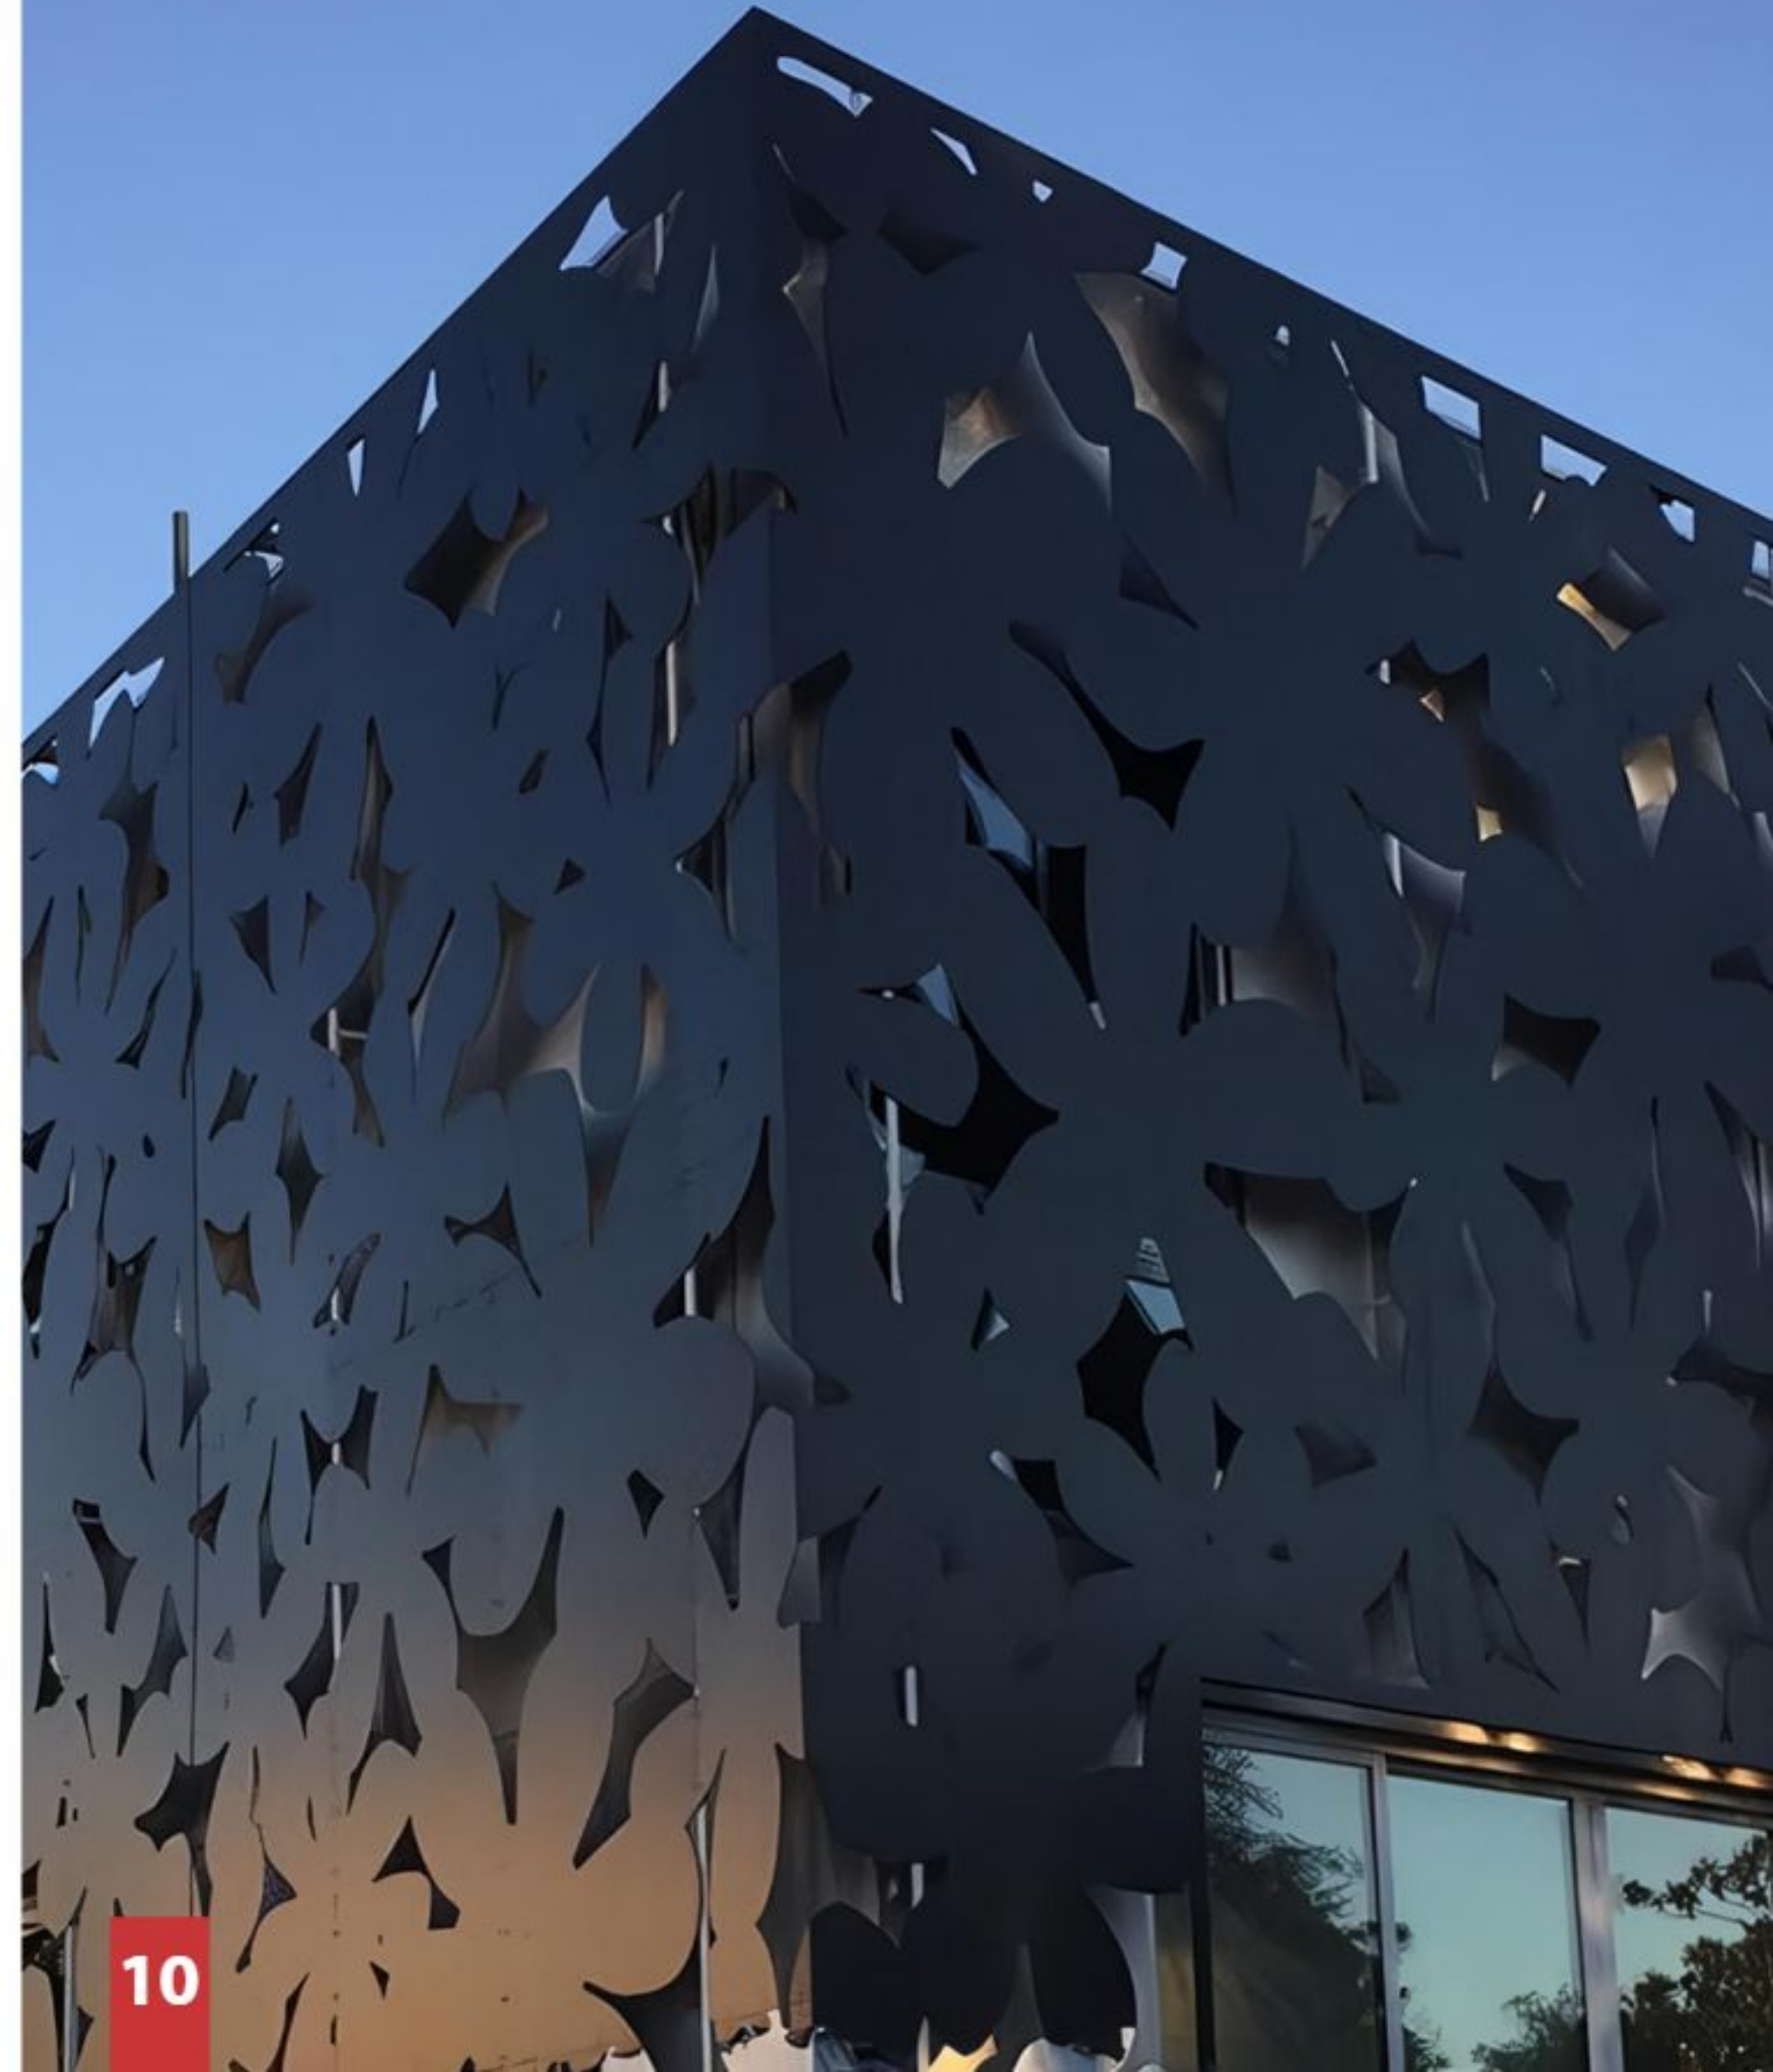

Trusted partnerships with leading international brands

Experienced engineering and installation teams

Proven capability in large-scale commercial, governmental, medical and residential projects

*Built on Quality.
Driven by Innovation.*

Shaping the skin
of architecture.

Our Commitment

Dedicated to delivering durable, high-performance facade solutions. We focus on precision engineering, strict quality standards and modern design systems that ensure every project meets the highest level of performance and reliability.

Completed Projects

- DISMAR Group has successfully delivered façade and aluminum solutions across residential, commercial, and infrastructure projects, ensuring precision, durability, and refined design.
